

The Microsoft® Technology Centers (MTCs) are collaborative environments that provide access to innovative technologies and world-class expertise, enabling you to envision, design, and deploy solutions to meet your exact needs.

Outstanding Environment: The MTCs include a spectrum of purpose built environments to ensure world class learning and development experiences.

Technology Experts: The MTC staff are experts in Microsoft technology solutions. They will work side by side with your team to rapidly find solutions to your technology challenges. Our staff's expertise and in-depth knowledge of Microsoft products and technologies ensure that you benefit from development best practices.

Industry Leaders: The MTCs have formed alliances with industry leaders to provide comprehensive resources, including hardware, software, and services, for the duration of your team's engagement.

An MTC's dynamic collection of resources shortens your time-to-market by removing traditional barriers and reduces the total cost of solution acquisition. Drawing on the integrated innovation of Microsoft products and technologies, the MTC can be a powerful resource for your organization.

The Microsoft® Technology Centers (MTCs) marshal their premier resources into unique offerings, each of which focuses on a different aspect of your organization's search for a solution.

Strategy Briefing: This one-day briefing starts by examining your current IT environment and business objectives. Then it moves into the Envisioning Center, where you'll see Microsoft solutions in action, through powerful demos and scenarios customized to meet

your needs. The day includes mutual discovery, tailored product and technology drill-downs, and expert presentations. It culminates with the delivery of a clear and actionable picture of how Microsoft and partner technologies can help you reach your business goals.

Architecture Design Session: This custom session focuses on your business objectives and aligns them with specific applications of Microsoft software to help you not only meet your goals, but also capitalize on them. We'll provide architectural guidance, consultation

on preferred practices, and risk analysis to chief technology officers, architects, and senior members of your development team.

Proof-of-Concept Workshop: In this multiweek, in-depth workshop, our architects work closely with key members of your technical staff to transfer knowledge and prove out customized solutions. This workshop may also include detailed demos and training sessions.

Your team will have a private, secure, and fully loaded development suite that's preconfigured prior to their arrival.
