
Enterprise Informatics' announces eB availability for Microsoft Windows Server 2008.

Simplifies administration, enhances security and increases scalability

SAN DIEGO, CA (PRWEB), Feb 27, 2008 - Enterprise Informatics, Inc. (OTCBB: EPRS), a leading provider of Enterprise Information Management solutions announced today that its flagship product eB is available for Microsoft Windows Server 2008.

eB is a commercial enterprise information management solution that uniquely manages the connectivity to all relevant enterprise information including documents, records, assets, people, processes & projects. The eB solution provides five key functions for managing the lifecycle of enterprise information:

1. Document management and control
2. Change management
3. Records management
4. Document distribution
5. Configuration management

"Our customers utilize eB to meet stringent operational and regulatory compliance requirements that demand a high level of reliability and scalability offered by the Microsoft platform," said Alan Kiraly, CEO, Enterprise Informatics. "Security and installation capabilities offered in Windows Server 2008 are a big benefit for our customers."

As one of 400 Microsoft Gold Certified Partners, Enterprise Informatics has been an early adopter of Microsoft's latest technologies. eB Director 14.4.2 received the Certified for Windows Vista logo in June of 2007 and eB is built on the .NET Framework and extends the document management capabilities of Microsoft Office SharePoint Server 2007.

"Microsoft is pleased to be working with Enterprise Informatics to expand the offerings for customers of Windows Server 2008," said Ward Ralston, Group Technical Product Manager for Windows Server Marketing at Microsoft Corp. "Our industry partners play an essential role in ensuring that our customers have the best technology foundation available, and eB helps deliver valuable new functionality to customers."

Enterprise Informatics will be exhibiting eB at Microsoft's "Heroes Happen Here" launch event held in Los Angeles, CA on Feb 27, 2008. With the combined launch of Windows Server 2008, Microsoft SQL Server 2008 and Microsoft Visual Studio 2008, Microsoft's 2008 launch event is expected to be the largest outreach to customers, partners, IT Professionals and Developers in Microsoft history.

About Enterprise Informatics

Enterprise Informatics provides an enterprise information management solution, eB, which ensures the integrity of controlled information by uniquely managing its connectivity to all other relevant information -- documents, records, physical assets, people, processes and projects. eB creates an ecosystem for the rapid access of accurate information in context that results in reducing the cost of meeting compliance and improving operational efficiency.

Key customers include Entergy, NuStart Energy, Constellation Energy, Continental Express, Ameren UE, City of Dayton, Lloyds Register of Shipping, City of Wilson, City of Lancaster, Northeast Utilities, Colorado Springs Utilities, Network Rail, Aker Kvaerner, City of Las Vegas, City of Winston Salem, and Fayetteville Public Works Commission.
