

Polycom CX200 Desktop Phone

For Microsoft Office Communicator 2007

The Polycom CX200 Desktop Phone interfaces seamlessly with Microsoft® Office Communicator 2007 to enable high-quality handset or hands-free calls from your computer with the ultimate in flexibility and simplicity combined with remarkable wideband voice quality.

MAKE GREAT THINGS HAPPEN WITH THE POLYCOM CX200 DESKTOP PHONE

In today's Internet-driven world, the ability to conduct real-time communication and collaboration has become critical to an organization's survival. As the market leader in voice, video, data and Web solutions, Polycom's award-winning telephony technology makes it easy for people to interact and maximize productivity—over any network, in just about any environment, anywhere around the globe. That's why more organizations worldwide use and prefer Polycom conferencing solutions. Because when people work together, great things happen.

The Polycom CX200 Desktop Phone gives users the ultimate in calling convenience from their Office Communicator 2007-enabled computer. With its sleek, high-quality handset and its full duplex, hands-free speakerphone, the Polycom CX200 Desktop Phone enables crystal-clear, natural conversations without echoes or feedback.

Enjoy the freedom of not wearing a headset for hands-free calls, or the privacy and familiarity available with the handset, all using the latest in wideband audio technology to provide the highest quality audio experience.

The Polycom CX200 Desktop Phone includes keys for controlling volume, mute speakerphone mode and use of an external headset. LED indicators provide the user with call forwarding status and message waiting indication. A large LED conveys the presence status of the user. The Polycom CX200 Desktop Phone connects and powers through an integrated USB cable for easy installation and use, so there are no extra cables to carry or batteries to charge. The Polycom CX200 is fully Plug-and-Play compatible, which means no special drivers or software is required.

The Polycom CX200 Desktop Phone is expected to ship in the third quarter of 2007 and will be available worldwide through Polycom sales channel partners.

Polycom CX200 Desktop Phone

BENEFITS

Integration with Windows® XP and Windows Vista™

- Integrated functionality for convenient computer calling is optimized to deliver a seamless unified communications experience with Windows XP or Windows Vista, without the need for any specialized drivers or software.

Hands-Free Freedom

- Users can untie themselves from their headset for clear one-on-one calls or group conversations with full duplex speakerphone mode.

High-Fidelity Handset and Speaker

- High-quality wideband audio for the best possible voice call quality.

Enhanced Presence Indicator

- Users can monitor presence status to ensure calls are routed according to their availability—not someone else's convenience.

Easy to Use

- Convenient buttons and integrated functionality with Office Communications Server 2007 enable users to seamlessly pick up and hang up calls, control volume, switch between handset and speakerphone mode and mute the microphone on the active call. Calls forwarded and message waiting indicators keep users up to date with their communication service status. Plug-and-Play operation ensures convenient immediate use simply by plugging in to a USB port on the PC.
