

## Polycom CX700 IP Phone

For Microsoft Office Communicator 2007

The Polycom CX700 IP Phone provides a true telephone experience for Microsoft® Office Communications Server 2007. The CX700 is a standalone IP phone with remarkable wideband voice quality and a brilliant, large touch-screen color display for truly convenient call management.

### **MAKE GREAT THINGS HAPPEN WITH THE POLYCOM CX700 IP PHONE**

In today's Internet-driven world, the ability to conduct real-time communication and collaboration has become critical to an organization's survival. As the market leader in voice, video, data and Web solutions, Polycom's award-winning telephony technology makes it easy for people to interact and maximize productivity—over any network, in just about any environment, anywhere around the globe. That's why more organizations worldwide use and prefer Polycom conferencing solutions. Because when people work together, great things happen.

The Polycom CX700 IP Phone delivers remarkable wideband audio quality that provides the ultimate voice communications experience. With its sleek, high-quality handset and its full duplex, hands-free speakerphone, the CX700 enables crystal-clear, natural conversations without echoes or feedback.

The Polycom CX700 IP Phone features a fully embedded Office Communicator 2007 client, providing direct, on-device access to the features and capabilities of Office Communications Server 2007, all using a bright, touch-screen color display. It also delivers enhanced presence status information and voicemail indication via an intelligent Windows® CE-based user interface, and enables users to easily control their calls, including click-to-call, conferencing, transferring, holding, forwarding and ending calls.

In addition, the CX700 includes a full telephone keypad, a scroll wheel for navigating the user interface and keys for controlling volume, mute, speakerphone and headset mode.

The Polycom CX700 IP Phone is expected to ship in the third quarter of 2007 and will be available worldwide through Polycom sales channel partners.

## Polycom CX700 IP Phone

### BENEFITS

Standalone IP Phone for use with Office Communications Server 2007

- Embedded Office Communicator 2007 client which does not require a PC to make calls or to gain access to personal and contact information.

High-Fidelity Speaker and Microphone

- High-quality wideband audio for the best possible voice call quality, whether in handset, full duplex speakerphone or headset mode.

Personal Configuration

- Users can use the biometric fingerprint reader or the on-screen keyboard to log in and personalize the CX700 with their own communications preferences.

Easy Call Management

- Easily monitor and manage your calls through the Windows CE-based touch-screen interface. Click-to-call with name-based calling from a user's contact list or call logs. Enhanced incoming call information lets users quickly decide how to deal with a caller.

Enhanced Presence

- On-screen presence status indicators are shown for each of a user's contacts to let the user know when and how they can be reached. Users can also set their own presence state via the touch screen, and a large, bright LED shows your current presence state.

Ultimate Flexibility

- Users can use the CX700 in the way that's most convenient to them: by accessing voicemail, plugging their wireless headsets into the on-board USB connector or standard RJ-9 jack, typing via the on-screen keyboard, connecting their computers to the on-board Ethernet port, or viewing their calendar information directly on the device.

Easy to Use

- Convenient buttons, a familiar telephone keypad and a navigation wheel allow users to make calls the traditional way while supporting enhanced navigation to pick up and hang up calls, control volume, switch to speakerphone or headset mode and mute the microphones on the active call.
