

# Microsoft Learn for Educators

Educators play a vital role in empowering students to prepare for future success in the modern digital workplace. With Microsoft Learn for Educators (MSLE), you'll receive comprehensive resources and training to enhance the classroom experience with an industry-leading curriculum to build your students' technical skills for the future.

## Give students the education they need for a successful future

Technology is quickly becoming an essential part of every industry. That's why MSLE is being incorporated in curricula across the globe. Educators can access official teaching materials and content to help their students **earn industry-recognized certifications** so they can thrive in the fast-paced world.

MSLE has given over

# 4,500

educators

training, technology and tools to set students up for future success.

## Equip yourself to deliver in-demand courses

Teaching a new curriculum can feel daunting, but we're here to support you. From self-paced learning paths to Microsoft virtual learning days, MSLE, as well as Microsoft Official Curriculum Virtual Educator Prep Sessions, we believe that online training can truly equip you to teach **technical skills** and **provide hands-on labs**.

## Engage and collaborate with an exclusive, global community of educators

By signing up for MSLE, you will gain access to a Microsoft Teams-based online network of fellow educators and Microsoft Teams members. Engage with peers to learn and **share best practices**, **connect** with and find support from a community of educators all working to make a huge impact on students in the classroom.

**"It's very important to see how technology can help meet the needs and demands of the sectors it operates in. That's what makes the Microsoft Learn for Educators Program so compelling: it encourages students to leverage technology to bring a larger impact to society."**

Erwin Zinser, Professor of Biochemistry and Information Management, FH Joanneum

## Teach highly relevant skills

MSLE has everything you need to **provide cutting-edge digital instruction** whether you choose to sign up as an individual or an institution. Sign in to your Microsoft Learn Profile using your institutional email and **get a range of teaching materials** including full course module content and trainer guides aligned to industry-recognized Microsoft certifications. You'll also get **discounted practice exams** and **exam vouchers**.

Explore MSLE today and discover how you can **integrate Microsoft training and certifications into your curriculum to help your students have a successful career in today's technology-driven world.**
