Microsoft Defender Experts for XDR

Go beyond the endpoint with managed XDR to help stop attackers and prevent future compromise

What is Defender Experts for XDR?

Defender Experts for XDR is a managed extended detection and response (MXDR) service that gives security teams air cover with leading end-to-end protection and expertise. Powered by Microsoft’s industry-leading Defender XDR suite, Defender Experts for XDR helps security teams triage, investigate, and respond to incidents to help stop attackers in their tracks and prevent future compromise.

Security teams face talent shortages and are unable to scale their security programs to keep up with their growing attack surface. Organizations cannot fight this fight alone and are turning to managed services to bring expertise to their teams immediately, help address coverage gaps, and add capabilities like proactive threat hunting and detection and response to augment their overall security operations.

Applying leading AI capabilities and threat intelligence, our Defender Experts team helps you drive SOC efficiency and stay ahead of emerging threats so you can focus on what matters.

Focus on incidents that matter
Triage and investigate prioritized incidents to focus on those that require immediate attention.

Respond with confidence
Contain and mitigate incidents across the Defender XDR suite faster with managed response and proactive remediation.

Access Defender Experts on-demand
Extend your team’s capacity with 24/7 access to Defender Experts via live chat for assistance.

Prevent future attacks
Reduce incidents over time with detailed recommendations to improve your overall security posture.
Triage, investigate, and remediate incidents to help stop attackers in their tracks and prevent future compromise
