

Windows Autopatch

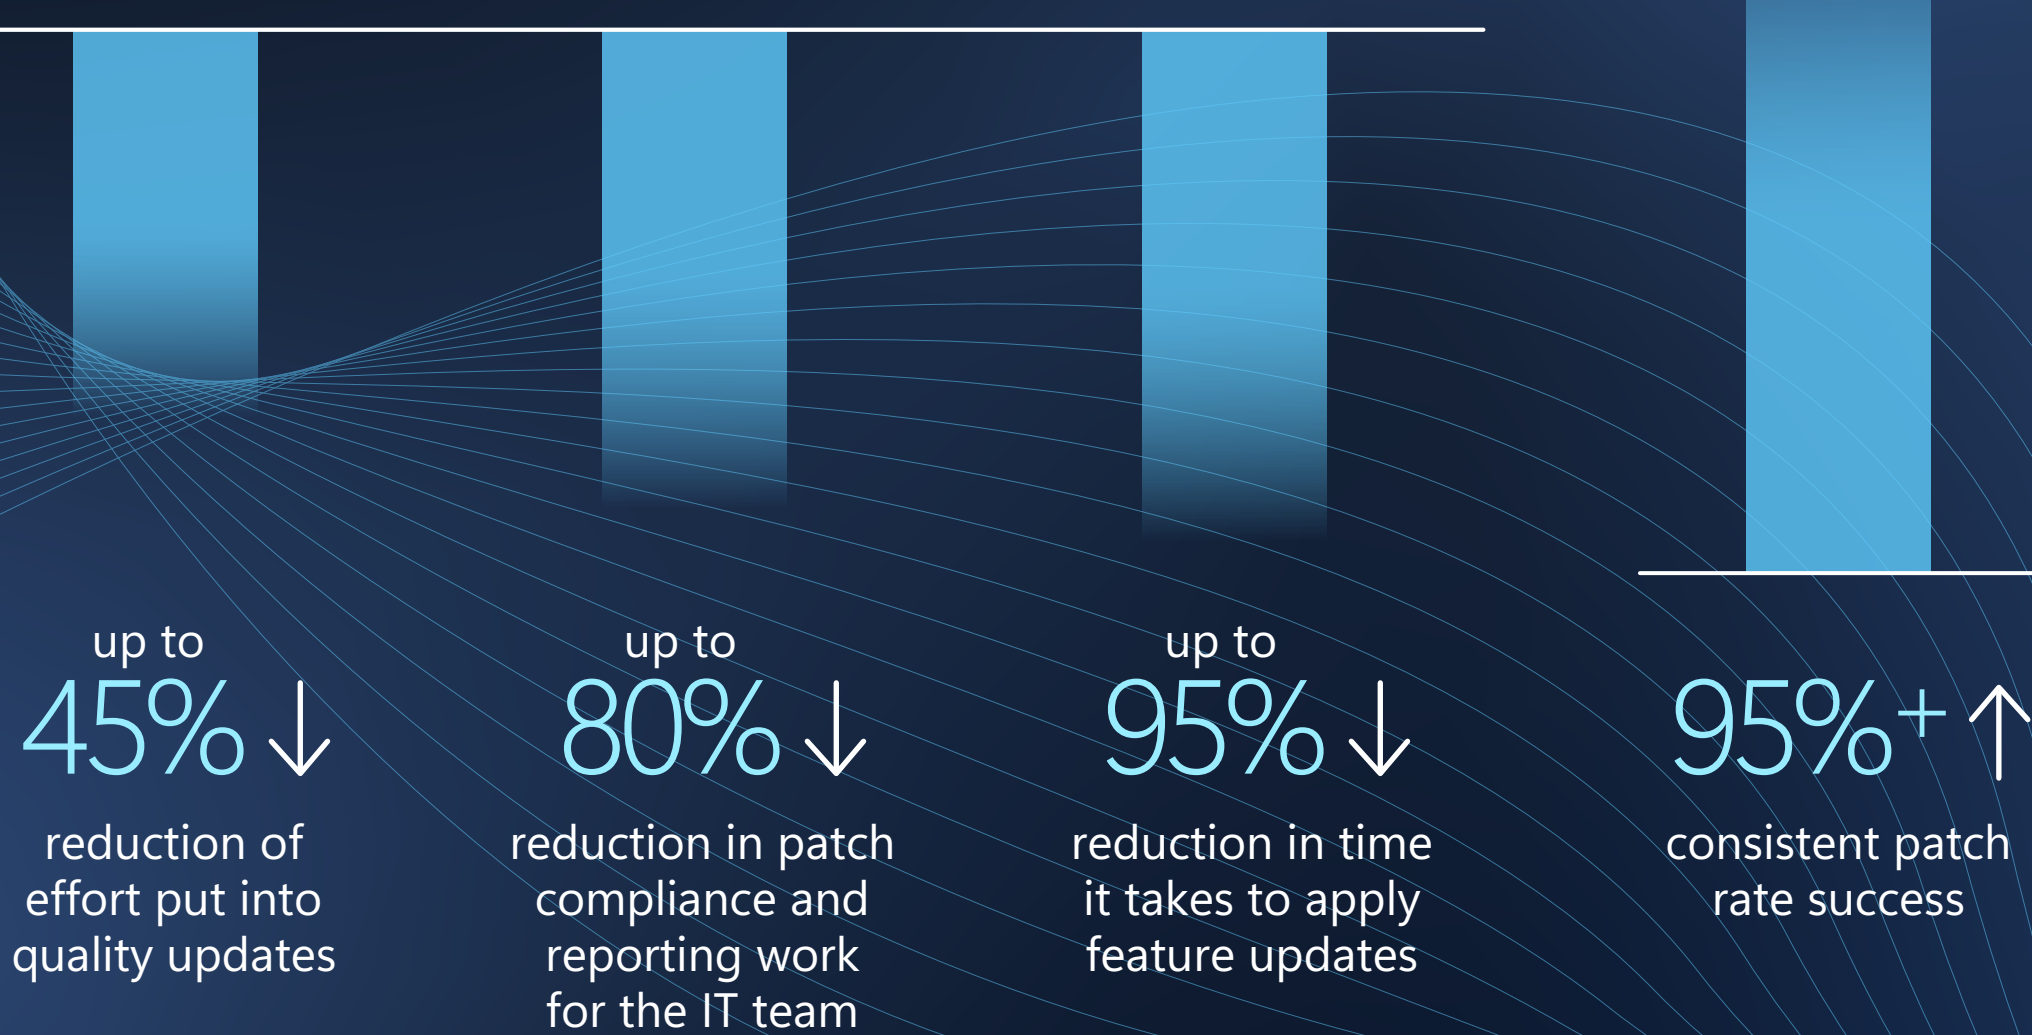

System updates are important. So is your time and money.

“Windows Autopatch makes our lives a lot easier. Being able to push out the latest and greatest straight away. It’s a dream for us.”

IT architect, government agency

Managing enterprise IT today is demanding. You’re being asked to do more—harden your security posture, defend a larger attack surface, and keep all your systems up to date—all in less time and with fewer resources. What if you could deliver new value with automated patching and updates?

Up to **\$1.4M** in savings achieved over a three-year period with Windows Autopatch.

Unlock new Windows E3 and E5 value with Windows Autopatch.

Windows Autopatch is an intelligent managed service that keeps Windows, Microsoft 365, Microsoft Edge, and Microsoft Teams current, giving you visibility and control while freeing you to focus on other priorities.
