

# The future of hybrid courts is here

How Microsoft is keeping courts in session

## The world is changing faster than ever, and our court systems can't afford to slow down

There's no other choice: courts need to go virtual to keep up.

**+75%**  
of governments

will operate more than half workloads using hyperscale cloud service providers.<sup>1</sup>

**76%**  
of judges and court professionals

indicate that virtual court opportunities increase access to justice for litigants.<sup>2</sup>

**78%**  
of case court professionals

cite failure to appear for in-person hearings as the main cause of case delays.<sup>3</sup>

Judges and courtrooms want a hybrid court solution that can handle various types of hearings, workloads, and conditions, as well as integrate case files and documents.

## Microsoft can help by providing trusted solutions for hybrid court proceedings

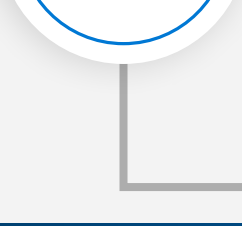

Azure Communication Services provides rich communication experiences with the same secure platform used by Microsoft Teams.
