Microsoft Surface Laptop Studio
A transformative way to work

Work the way you want whether compiling code on a powerful business laptop, multitasking while docked on a perfectly angled stage, or sketching ideas on a full-horsepower creative studio.

**BENEFITS**

Pull forward the display in stage mode at the perfect angle for docking, presenting to your client, and touch-first tasks, thanks to the dynamic woven hinge.

When docked in stage mode and connected to up to two external monitors, Surface Laptop Studio becomes a touch-and-digital pen enabled third monitor with an extra dimension of interaction.

Draw, write, and sketch with your digital pen in studio mode. Surface Slim Pen 2\(^1\) magnetically attaches, stores, and recharges under the keyboard so it’s always within reach and ready when you are.
