Microsoft Research Faculty Summit 2014 15th Annual
Remixing and post-human design
Jeffrey V. Nickerson

Collaborators: Yue Han, Harris Kyriakou, Pinar Ozturk.
This material is based upon work supported by the National Science Foundation under grants 0968561 and 1211084.
Post-human design
Remixing
Visibility
Steps

- Observe collective design systems
- Understand natural visibility
- Design new features
- Perform experiments
- Release features into the open
- ...with the goal of increasing innovation at the societal level
Post-human responsibilities

• Measure distances
  • Between designs
    • String edit, graph edit, spectrum
  • Between people
    • Through following
    • Through common editing of objects

• Recommend designs to modify and combine
  • Not too close, not too far
Are remix communities already post-human?
Save the planet and return your name badge before you leave (on Tuesday)
