

STEM Student Challenge 2017

How will technology have changed in 20 years?
We want you to show us!

Invent the future in The Microsoft STEM Student Challenge.

The Challenge is open to teams of 4-6 students in years 8-10. Select one of the following categories and come up with an original technology idea that could exist in that field in 20 years' time:

- Artificial intelligence and virtual reality
- Data security
- Healthcare

Create a two-minute video depicting your idea and you could win:

- A day at Microsoft's Research lab where you can present your idea to world-leading computer scientists
- Up to £5,000 worth of computing equipment for your school
- Awesome Microsoft prizes!

To be part of a team, contact:
